4. Under the Water category, Select "Construction Site Storm Water" and save changes

New Publications

Topic	Publication Type	Date Published	Official Name (Document Number)	Key Topics
Construction Site Uniform State-wide Standards	Guidance	10/2014	Implementation of 2013 Wisconsin Act 20 for Construction Site Erosion Control and Storm Water Management (3800-2014-03)	Critical elements include : <ul style="list-style-type: none"> ✓ All sites where one or more acres of land disturbance is planned are now permitted through DNR, including one and two family dwellings and commercial sites ✓ Clarification on the establishment and implementation of Uniform Statewide Standards
Application	Form	07/2014	Attachment C- Construction Site General Permit NOI Application Checklist (3500-053C)	Permit Application Form, replaces NOI Attachments A and B; formatted as a checklist
Delayed Implementation	Guidance	05/2014	Maintaining BMP's in Locations that Qualify for Delayed Implementation for the Highway Reconstruction Standard (3800-2013-06)	Post-construction storm water requirements for highway reconstruction within areas covered by Municipal Separate Storm Sewer System permits
Infiltration	Guidance	03/2014	Meeting Infiltration Performance Standard of NR 151 (3800-2013-05)	Expectations for sites with potential barriers to infiltration
Post-Construction	Technical Standard	12/2014	Permeable Pavement (1008)	Technical Standard for pavement systems such as pervious concrete, porous asphalt, and permeable pavers/blocks designed to achieve water quality and quantity benefits. Surface clogging capacity and technical note revised in December, 2014.

Updated Publications

Topic	Publication Type	Date Published	Official Name (Document Number)	Description of Primary Changes
Site Definition	Guidance	02/2015	Construction Site Definition-Common Plan of Development (3800-2014-02)	Existing document reissued under current process for promulgating guidance; removed obsolete language
Post-construction	Technical Standard	10/2014	Bioretention for Infiltration (1004)	<ul style="list-style-type: none"> ✓ Modified engineered soil mix ✓ Depth of engineered soil ✓ Plant Spacing ✓ Coconut mat allowed
Sediment Control	Technical Standard	10/2014	Sediment Trap (1063)	Removed flow through stone equation from References.
Sediment Control	Technical Standard	07/2014	Storm Drain Inlet Protection for Construction Sites (1060)	Option Added
Termination	Form	05/2014	Notice of Termination (3400-162)	Converted to fillable PDF format
Application	Form	03/2014	WRAPP Application (3500-053)	Added pre-application screening questions
Post-construction	Technical Standard	03/2014	Site Evaluation for Stormwater Infiltration (1002)	Permeable pavement added to Table 1.
Erosion Control	Guidance	04/2015	Erosion Control Notes (3800-2015-03)	Sample erosion control notes
Post-construction	Guidance	04/2015	Guidance for the Establishment of Protective Areas for Wetlands in Runoff Management Rules, Wis. Admin. Code NR 151 (3800-2015-02)	Update to guidance document clarifying implementation of wetland protective areas

Draft Publications

Topic	Publication Type	Public Notice	Official Name (Document Number)	Description
Sediment Control	Guidance	Pending	Construction Site Soil Loss and Sediment Discharge Calculation Guidance (3800-2015-06)	Methods and procedures to document compliance with the 5 tons per acre per year sediment performance standard for construction sites
Post-construction	Guidance	02/2015	Modeling Post-Construction Storm Water Management Treatment (3800-2015-04)	Update to guidance on modeling post-construction best management practices
