Re: 2018 Capital Budget Proposal Engineering - Other Projects

Introduction

The Engineering - Other Budget funds projects that don't fit within the Engineering Divisions five major budgets, Facilities Management, Major Streets, Bicycle / Pedestrian, Storm Sewer and Sanitary Sewer Budgets

The "Engineering – Other Projects" budget proposes changes to the capital budget including removing "Underground Storage Tanks", transferring "Public Drinking Fountains" to Parks Department for inclusion in their capital budget, and updating "Waste Oil Collection Sites" financial requests to complete work as planned.

"Engineering – Other Projects" has prioritized for 2018 "Warning Sirens" and maintaining "Equipment and Vehicle Replacement" and funding "Waste Oil Collection Sites". The waste oil collection sites funding has been revised to reflect past bids and make an effort to complete the renovation of the four (4) City sites by 2021. The lowest priority for this budget proposal is "Right of Way Landscaping & Trees" however it is a very popular program that contributes to the quality of life in the City.

Prioritized List

- 1. Warning Sirens
- 2. Equipment and Vehicle Replacement
- 3. Waste Oil Collection Sites
- 4. Service Building Improvements
- 5. Aerial Photo/Orthophotos
- 6. Right of Way Landscaping & Trees

Discussion of Criteria

City Engineering prioritized the "Engineering – Other Projects" budget by maintaining the City's level of services provided to users, safety and environmentally sensitive projects. The City's warning siren system is needed to provide for developing areas. The equipment and vehicle replacement program provides a key component for operations of the City's sanitary sewer, storm sewer and landfill infrastructure. Without the current level of funding, vehicle maintenance costs would rise due to an aging fleet. The City's waste oil collection sites are environmentally sensitive and in need of renovation. This program would improve spill prevention and environmental impacts with a plan to complete upgrades of all City sites by 2021.

Agency

Engineering - Other Projects

Proposal Name	Munis #
Aerial Photo / Orthophotos	11086

Proposal Description

This program provides updates to the City's GIS base mapping of the aerial photography for the existing City lands as well as adjacent areas into which the City may expand. The goal of this program is to provide data and imagery from these mapping efforts to support efficiency in the City's operations and planning efforts. Data from the program is utilized by City Utilities, Planning, and Public Safety agencies.
