

## Instructions for using the Olbrich Botanical Gardens Project time lapse video website:

1. You can access this video from this link:  
[https://public.earthcam.net/Olbrich\\_Botanical\\_Gardens\\_Expansion\\_Phase\\_1#/Olbrich%20Botanical%20Gardens](https://public.earthcam.net/Olbrich_Botanical_Gardens_Expansion_Phase_1#/Olbrich%20Botanical%20Gardens)
2. In the upper left hand corner are 2 presets. One is the archive for the Learning Center, the other is the archive for the Greenhouse. Select which archive you want to look at.

3. The screen begins totally grey but if you drag your mouse to the bottom of the viewer window you will see the movie controls. Click the little push pin in lower left to fix the control bar in place. Click the play button and the movie will run at the default speed.

4. If you pause the video you can click the white dot on the time lapse bar or drag the dot to look at individual frames.

5. In the lower right corner you can change the playback speed. Right now playback speed seems to look best at 1x which is the default. You can speed it up or slow it down by selecting a different speed. As more video gets added a faster playback may be better to shorten the video playtime.
