Saltimus Prime wins!

Saltimus did not receive a mathematical majority of the support. A mathematical majority would have required at least 1,939 votes. However, by the final elimination round it appeared on more ballots than the second place finisher. Therefore, Saltimus was declared the winner

Explaining the chart:

In Round 1, everyone's first place votes were tallied. No one candidate received a majority of support.

The 58 ballots who voted for Eb-brine-eezer had their votes distributed to the next ranked choice on their ballots for Round 2.

Also in Round 2, you will see that there were 3 "exhausted ballots." That means 3 ballots only chose Eb-brine-eezer Scrooge and they made no other rankings. Since there were no candidates to receive those three votes, they become "exhausted."

In Round 2, again no majority was found, so the next lowest vote-getter was eliminated – Haline Dugan, PhD.

The 78 votes of Haline were redistributed to the other rankings on their ballots for Round 3.

You'll see that there are now 15 "exhausted ballots."

This means 15 people voted for **only** Haline or Eb-brine-eezer without ranking other candidates. And since these candidates are eliminated, those ballots are now considered exhausted.

That process repeated itself for 14 Rounds looking for a name that received a mathematical majority of support of the ballots. Since no name achieved that, Saltimus was declared the winner as it had the most votes by the final elimination round

MT7 Trackless Bike Path Plow Vote Breakdown

	Round 1	Round 2	Round 3	Round 4	Round 5	Round 6	Round 7	Round 8	Round 9	Round 10	Round 11	Round 12	Round 13	Round 14

Snowbi Wan Kenobi wins!

Snowbi Wan Kenobi achieved a mathematical majority of support in Round 14. A mathematical majority required at least 1,771 votes, and Snowbi received 1,910.

Explaining the chart:

In Round 1, everyone's first place votes were tallied. No one candidate received a majority of support.

The 26 ballots who voted for Spokes'man had their votes distributed to the next ranked choice on their ballots for Round 2.

Also in Round 2, you will see that there were 2 "exhausted ballots." That means 2 ballots only chose Spokes'man and they made no other rankings. Since there were no candidates to receive those 2 votes, they become "exhausted."

In Round 2, again no majority was found, so the next lowest vote-getter was eliminated – Plowaton.

The 49 votes for Plowaton were redistributed to the other rankings on their ballots for Round 3.

You'll see that there are now 3 "exhausted ballots."

This means 3 ballots voted for **only** Spokes'man or Plowaton without ranking other candidates. Since these candidates are eliminated, those ballots are now considered exhausted.

That process repeated itself for 14 Rounds looking for a name that received a mathematical majority of support of the ballots. And finally in Round 14, the final elimination round, Snowbi Wan Kenobi was found to have received a mathematical majority of support.

Dolly Plowton wins!

Dolly did not receive a mathematical majority of the support. A mathematical majority would have required at least 1,733 votes. However, by the final elimination round it appeared on more ballots than the second place finisher. Therefore, Dolly was declared the winner

Explaining the chart:

In Round 1, everyone's first place votes were tallied. No one candidate received a majority of support.

The 83 ballots who voted for Drifity Do Dah had their votes distributed to the next ranked choice on their ballots for Round 2.

Also in Round 2, you will see that there were 5 "exhausted ballots." That means 5 ballots only chose Drifity Do Dah and they made no other rankings. Since there were no candidates to receive those 5 votes, they become "exhausted."

In Round 2, again no majority was found, so the next lowest vote-getter was eliminated – Winged Victory.

The 110 votes of Winged Victory were redistributed to the other rankings on their ballots for Round 3.

You'll see that there are now 15 "exhausted ballots."

This means 15 people voted for **only** Drifity Do Dah or Winged Victory without ranking other candidates. And since these candidates are eliminated, those ballots are now considered exhausted.

That process repeated itself for 14 Rounds looking for a name that received a mathematical majority of support of the ballots. Since no name achieved that, Dolly was declared the winner as it had the most votes by the final elimination round

Seymour Pavement wins! By just 13 votes!

Seymour did not receive a mathematical majority of the support. A mathematical majority would have required at least 1,723 votes. However, by the final elimination round it appeared on more ballots than the second place finisher. Therefore, Seymour was declared the winner

Explaining the chart:

In Round 1, everyone's first place votes were tallied. No one candidate received a majority of support.

The 26 ballots who voted for Speed-the-Plow had their votes distributed to the next ranked choice on their ballots for Round 2.

Also in Round 2, you will see that there were 4 "exhausted ballots." That means 4 ballots only chose Speed-the-Plow and they made no other rankings. Since there were no candidates to receive those 4 votes, they become "exhausted."

In Round 2, again no majority was found, so the next lowest vote-getter was eliminated – Plowedly Whitford.

The 28 votes for Plowedly Whitford were redistributed to the other rankings on their ballots for Round 3.

You'll see that there are now 5 "exhausted ballots."

This means 5 people voted for **only** Speed-the-Plow or Plowedly Whitford without ranking other candidates. And since these candidates are eliminated, those ballots are now considered exhausted.

That process repeated itself for 14 Rounds looking for a name that received a mathematical majority of support of the ballots. Since no name achieved that, Seymour was declared the winner as it had the most votes by the final elimination round
